EXPERIENCE

Senior Associate Software Engineer

Light & Wonder, India

10/2024 - Present

Bangaluru, India

Achievements/Tasks

- **RESTful APIs** : Developed and maintained **RESTful APIs using Spring Boot** , improving backend performance and ensuring seamless integration with Angular front-end applications.
- **Gaming User Interfaces (UI)**: Skilled in developing intuitive and visually engaging gaming user interfaces(UI), focusing on enhancing user engagement and delivering optimized performance across platforms.
- **Lazy Loading Implementation** : Integrated lazy loading techniques to boost application performance and efficiency by minimizing initial load times
- **Cross-Functional Collaboration** : Collaborated effectively with back-end teams to ensure smooth integration and communication between front-end and back-end systems via RESTful APIs.
- Developed and maintained RESTful APIs using **Spring Boot** , enabling seamless integration between frontend and backend systems. Designed and implemented **database schemas** and performed CRUD operations using **Hibernate/JPA** with **MySQL**.

Software Engineer

Happiest Minds Technologies

08/2022 - 10/2024

Bangaluru, India

Achievements/Tasks

- **Enhanced Performance and Responsiveness** : Improved overall platform performance and responsiveness across multiple projects using Angular 14+ and 17.
- **Responsive UI Development**: Translated UX / Figma designs into modern, responsive web interfaces, ensuring seamless user experiences.
- **Optimized Site Speed** : Conducted performance optimizations, significantly reducing load times and enhancing site speed.
- **Real-Time Functionality** : Developed real-time features like dynamic product search and a dynamic items cart, improving user interactions.
- **Code Management** : Maintained codebase integrity and streamlined collaboration through effective use of Git for version control.

PROJECTS

Kiosk (10/2024 - Present)

- The Casio Center Reception Machine streamlines visitor check-ins, manages queues, offers real-time updates, and integrates systems for efficient service delivery, enhancing customer experiences and operational productivity.

TMF Cobalt Portal (01/2024 - 09/2024)

- Focused on enhancing a global payroll service portal by leveraging Angular 17. Worked closely with UX designers to transform wireframes into responsive interfaces and utilized Sass to maintain scalable and efficient stylesheets.

TMF Horizon Exchange Portal (02/2023 - 12/2023)

- Upgraded an existing global payroll service portal from AngularJS to Angular 14. The project involved modernizing the platform's UI to meet the demands of contemporary payroll delivery, enhancing the portal's functionality and user experience.

Grill'd (11/2022 - 02/2023)

- Developed a new platform from scratch for an Australian-owned restaurant chain specializing in healthy burgers. Built with React JS, the project focused on creating a responsive, high-performance UI and integrated real-time product search functionality for enhanced user experience.

ACHIEVEMENTS

Clean Coder Award

Recognized by the TMF client for exceptional coding practices and adherence to clean code principles, demonstrating high standards in software development.

Go The Extra mile Champion

Honored by the Happiest minds for outstanding contributions and exceeding expectations on project deliverables, showcasing dedication and commitment.
